

Leçon 09 – Correction des "Exercez-vous"

Exercez vous 2

Soit $X = (2, 1, -2, 4)$, $Y = (1, -4, 3, -1)$ et $Z = (-1, 0, -1, 2)$. Calculer $3X+2Y-Z$.

Solution

$$3X = (3 \times 2, 3 \times 1, 3 \times (-2), 3 \times 4) = (6, 3, -6, 12)$$

$$2Y = (2 \times 1, 2 \times (-4), 2 \times 3, 2 \times (-1)) = (2, -8, 6, -2)$$

$$-Z = (1, 0, 1, -2)$$

$$\text{D'où } 3X+2Y-Z = (6+2+1, 3-8+0, -6+6+1, 12-2-2) = (9, -5, 1, 8)$$
